

Scenario Based Learning

A) how will you achieve this in AI

If any of the employee suddenly resigning from the job first the employee has to send the formal mail to the TL, then the mail has to send to the HR. Now the AI process will start here.

1. Those who leave the work every month mail to HR. 3 months before remainder notification will show to the HR. This will help the HR to hire the new employee to the job.

2. After receiving the mail HR will send the confirmation mail to the employee regarding the resignation mail.

B) Find out the 3 stage of problem identification

1. stage1 Natural Language Processing

2. stage2 Supervised Learning

3. stage3 classification

c) Name the project

Job Resigning

D) Create the dummy dataset

INPUT	OUTPUT
Employee resign the job	Which employee next resign the job
